INTRODUCTION

Different characteristics are important for success in different jobs, and characteristics that are important in one job may interfere with performance in others. The Hogan Personality Inventory (HPI) evaluates candidates on seven well-known dimensions or characteristics that influence occupational success. This report is based on the candidate's scores on these dimensions and it is organized in three sections. Section I reviews the candidate's results focusing on (a) characteristics relevant for success in most work environments; (b) suitability for the position; and (c) the style with which he/she will interview. Section II provides a graphic report of the candidate's assessment results. Section III summarizes the recommendation for job fit and potential hiring.

SECTION I - SUMMARY OF ASSESSMENT RESULTS

Employment Fit

Average Score tends to be calm and even-tempered, and should manage his/her emotions appropriately regardless of the situation. He/She is a responsible team player who attends to details, but who can also be flexible about the rules. Average Score may not like formal training programs, and should prefer to learn new skills in a hands-on manner.

Job Fit

Mr./Ms. Score seems appropriately self-confident when there is pressure to perform. Mr./Ms. Score is not very competitive but can take on authority when needed. He/She is willing to address performance problems and he/she can do so without annoying others. Although he/she will support policies and processes, he/she can be flexible enough to adapt to new demands.

Candidate Strengths

- Satisfied with his/her performance
