Hogan’s scientific foundation and commitment to research distinguishes us from the competition. Each year, Hogan and our affiliates publish works that contribute to the knowledge and development of (a) the Hogan assessments and (b) the field of personality and psychology. These publications build the Hogan brand and allow us to better serve our clients worldwide.

Hogan employees work to promote our brand through publishing in well-known academic outlets and presenting at professional conferences. Also, we leverage the Hogan Academic Network, a group of researchers, professors, and students across the globe, to disseminate Hogan-related research through theses, dissertations, peer-reviewed journals, and professional conferences.

This year has been no exception to our commitment to progressing the science of personality. The list below details Hogan-related publications and presentations from 2013.
HOGAN PUBLICATIONS

PEER-REVIEWED PUBLICATIONS USING HOGAN INSTRUMENTS

**HOGAN CONFERENCE RESEARCH**
