

# Leadership: You're Doing It Wrong.

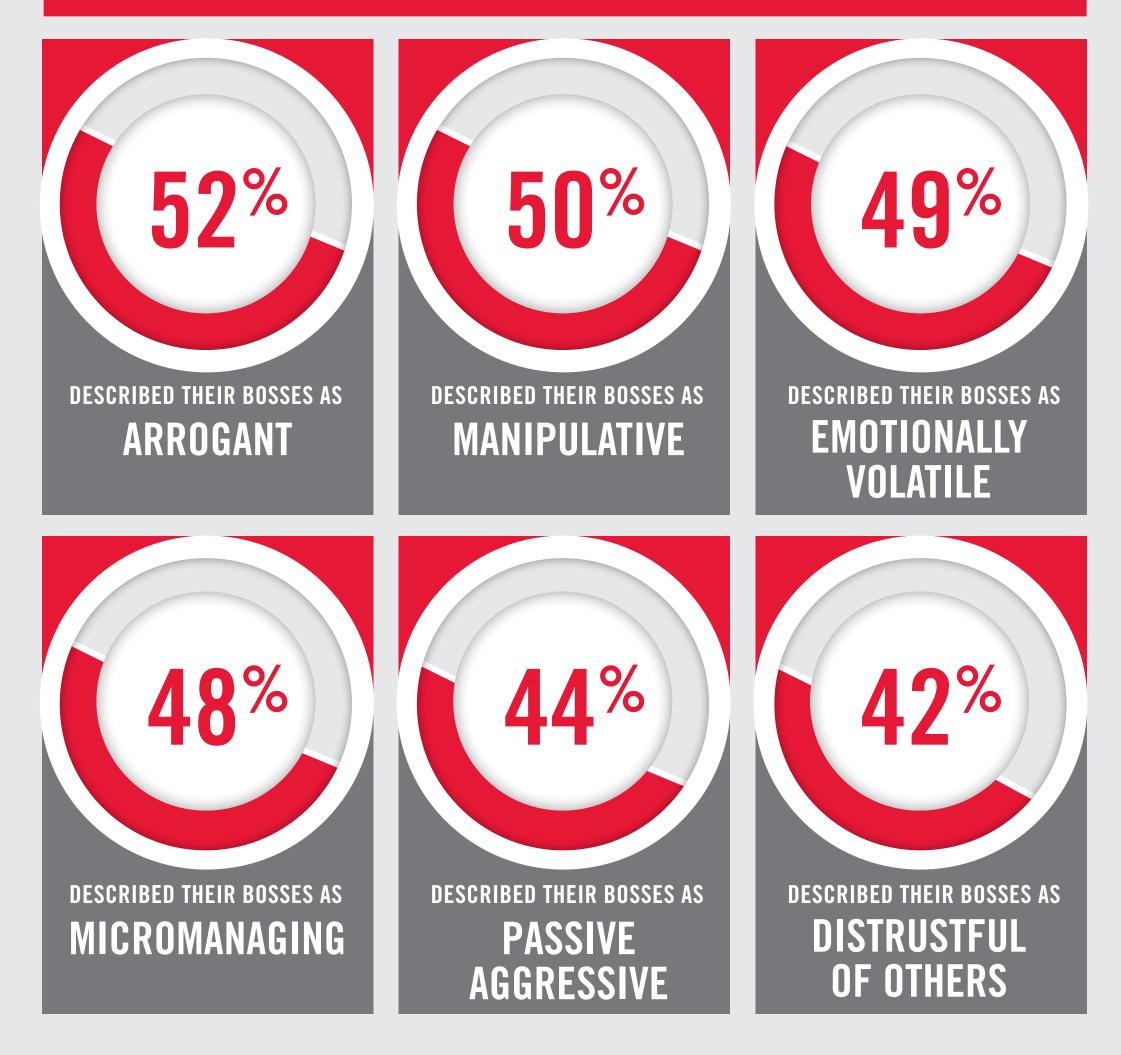

A defining look at the effects of leader personality on employee engagement and organizational performance.

## >> What makes a good leader?

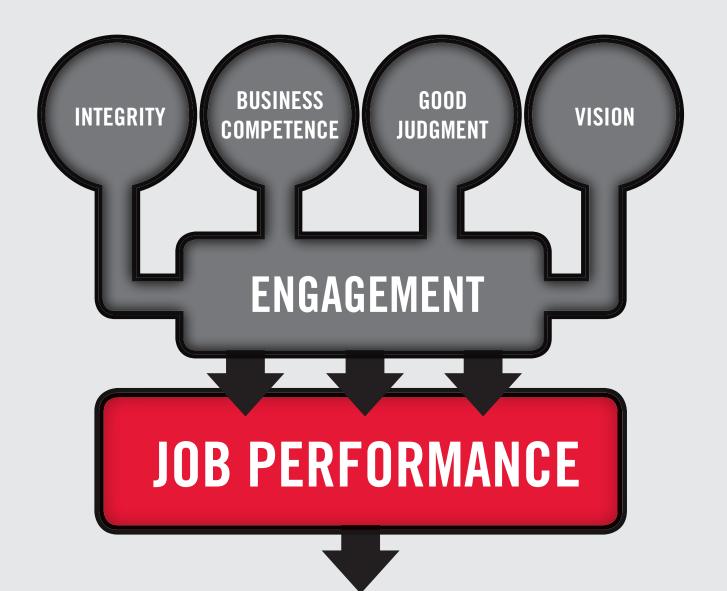

HR View	Hogan View
<b>Defined</b> by position – the person at the top <i>is</i> a leader.	<b>Defined</b> by the ability to build a high-performing team.
<b>Evaluated</b> by bosses and other superiors.	S <b>Evaluated</b> by the team's performance.
<b>Focused</b> on competencies valued by an organization.	<b>Focused</b> on qualities valued by the team.

#### >> Defining bad leadership

Hogan asked a large sample of working adults about the personalities of their best and worst bosses:

>> Why does leadership matter?

The bottom line: leadership creates engagement, higher employee engagement equals better organizational performance, and lower employee engagement equals worse organizational performance.

### >> Personality and leadership

#### HOGAN ASSESSES REPUTATION FROM TWO PERSPECTIVES:

### BRIGHT SIDE

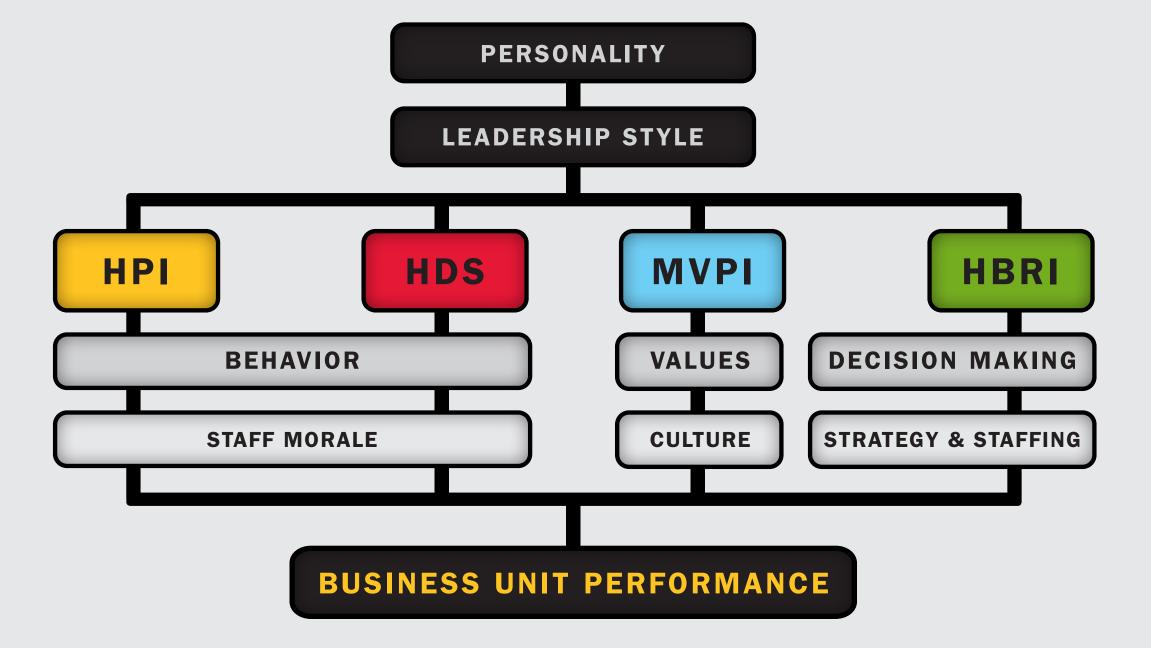

Bright-side personality, or normal personality, describes people when they are at their best. Bright-side personality is measured by the Hogan Personality Inventory (HPI), and predicts leadership performance across all organizational levels and industry sectors.

Dark-side personality describes people when they are stressed, bored, or simply not paying sufficient attention to their behavior. Measured by the Hogan Development Survey (HDS), this behavior alienates subordinates and prevents

managers from being able to build a team.

Leadership is the most important single factor determining success in business.
