- Teambuilding**
- Performance Management**

### **Background**

Patrick is a professional leadership coach with extensive experience in executive coaching, leadership development and team building.

Patrick has more than 20 years of Hewlett Packard training in the areas of coaching, diversity, teambuilding, and organizational effectiveness. By combining his extensive global human resources experience at Hewlett Packard with his line management and operations history, he provides a broad-based perspective when coaching leaders. He has a strong track record in helping leaders assess their personal leadership assets and liabilities as well as enhancing their ability to address staff development responsibilities.

Patrick is dedicated to helping high-level professionals around the world advance their leadership skills, and leverage their experience and talents to produce significant results. He has a strong track record in effectively coaching international business leaders across diverse industries, and in different stages of their career. His coaching has helped leaders and executives develop high performance teams and build their competitive edge.

Patrick prides himself on his dynamic coaching style—a direct result of his professional training and years of real-life work experience. He uses a variety of cutting edge assessment tools. Patrick was a contributor to the new Hogan book, *Coaching the Dark Side of Personality*.
